EDUCATIONAL PSYCHOLOGY REVIEW —Volume 8, 1996

Educational Psychology Review is an international forum for the publication of peer-reviewed integrative state-of-the-art review papers in the field of general educational psychology—i.e., the application of psychology to education—covering topics such as learning, cognition (e.g., memory, problem-solving, creativity, reading), measurement, motivation, individual differences, school-related counseling, and development. In addition, the journal publishes papers on the history of educational psychology, reviews of aspects of educational psychology as a profession, briefer reviews, commentaries, and special thematic issues from time to time. *Educational Psychology Review* provides breadth of coverage appropriate to a wide readership in educational psychology, yet each review is of sufficient depth to inform specialists in that area.
